
107-28 Tabulation of Template Quantities and Adjustments

(This section last updated 08-17-16)

This tabulation replaces 107-29 and 107-30 whenever a DOT borrow is not provided. When this tabulation is used, overhaul is not calculated and balances are not shown on the plan and profile sheets. Subtotals need to be added for each alignment and stage. Each sheet should have a minimum of one subtotal. A summary and grand total should be at the bottom of the last sheet. The top of each column will have a sequential number, and include a formula if there is any calculation required to obtain that result. An example of the desired result is shown in Section [1F-20](#).

Refer to Section [5B-3](#) for more information regarding contractor furnished borrow.
