

112-9 Shoulders

(This section last updated 01-15-14)

For a list of available unit weights for use in the calculations note, as well as where to use them, refer to [1B-4](#).

The Hot Mix Asphalt (TON and TON/STA) and Binder (TONS) columns are for field and contractor information. Shoulders are bid by area, as shown by the bid item designation on the two Paved Shoulder (SY) columns, and Binder is incidental when HMA is bid by area.
