

570-01 Slash Mulch Berm

(This section last updated 01-07-16)

Slash mulch berms are typically used in place of silt fence ditch checks. Use of these is limited to contractor request, if allowed by the Engineer. Since these are used in place of silt fence ditch checks, no bid item or tabulation is available. Slash mulch berms should not be included unless specifically requested by the Roadside Development Section.
