

Bridge Enhancement Concepts

Pedestrian Railing Concepts

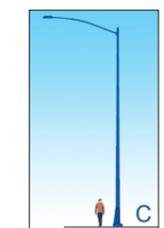

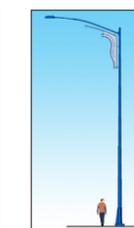

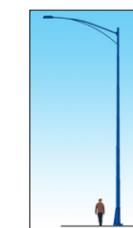

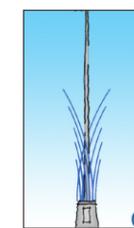

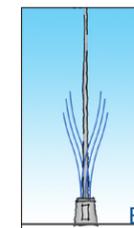

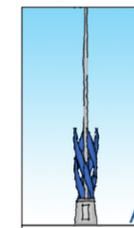

Abutment Concepts

Pier Designs

Light Pole Concepts

DESIGN CONCEPTS:

Utilizing the I-74 Guiding Principles, multiple design concepts have been advanced and are illustrated above.

The proposed Mississippi River crossing bridge type has influenced enhancement concepts for these smaller corridor bridges. Portions of the river crossing bridge could integrate many of these enhancement recommendations.

AVAILABLE FUNDING PRIORITIES

Enhancement recommendations within this category of corridor elements have been prioritized in the following order to be implemented as funding becomes available:

- Pedestrian Railings
- Abutments
- Barriers
- Lighting
