Marketing development summary

BJRY provides customers with a fully integrated approach to accessing the freight rail network for both domestic and international shipments. In addition to rail switching services, BJRY provides complete logistical solutions for the needs of our customers. BJRY can handle all or part of the rail shipment process – everything from ordering and billing cars, facilitating transloads from rail-to-truck or truck-to-rail at origin or destination, and provide support with its Class I partners as your commodity moves on the rail network.

BJRY provides this logistic support and offers transload services at each of its terminals. BJRY is able to provide to its customers custom daily reports, on-demand switching, dedicated customer support, and it has locomotives and crews stationed at each site. BJRY has experience handling most types of commodities, including lumber, paper, building materials, frozen food, liquid and dry bulk commodities, machinery, and specialty/oversize loads.
